Mental Health and Well-being Policy

St Albans Catholic Voluntary Academy

Last Updated January 2023

OUR SCHOOL VISION STATEMENT

‘Learning, Loving and Living together, side by side with God.’

Policy Statement

Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community. (World Health Organization)

At our school, we aim to promote positive mental health for every member of our staff and student body. We pursue this aim using both universal, whole school approaches and specialised, targeted approaches aimed at vulnerable students and families.

In addition to promoting positive mental health, we aim to recognise and respond to mental ill health. By developing and implementing practical, relevant and effective mental health policies and procedures we can promote a safe and stable environment for students affected both directly, and indirectly by mental ill health.

1. Scope

This document describes the school’s approach to promoting positive mental health and wellbeing. This policy is intended as guidance for all staff including non-teaching staff and governors.

This policy should be read in conjunction with our SEND policy where a student has an identified special educational need.

2. The Policy Aims to:

- Promote positive mental health in all staff and students
- Increase understanding and awareness of common mental health issues
- Alert staff to early warning signs of mental ill health
- Provide support to staff working with young people with mental health issues
- Provide support to students suffering mental ill health and their peers and parents/carers

3. Lead Members of Staff

Whilst all staff have a responsibility to promote the mental health of students. Staff with a specific, relevant remit include:

- Kate Johnson - Designated Safeguarding Lead (DSL)
- Jayne James – Senior Mental Health Lead // RSHE and PSHE Lead
- Jenny Cartlidge - Lead First Aider
- Ashley Leatham – SEND Coordinator // Deputy Designated Safeguarding Lead
- Patsy Wilson - Deputy Designated Safeguarding Lead
- Tim Brogan – Headteacher // Deputy Designated Safeguarding Lead
- Matt Blurton - Deputy Designated Safeguarding Lead
- Emmas Ruston-Donald - Deputy Designated Safeguarding Lead

Any member of staff who is concerned about the mental health or wellbeing of a student should speak a DSL/DDSL in the first instance. This will usually be followed up at a Priority Pupil meeting. If there is a fear that the student is in danger of immediate harm then the normal child protection procedures should be followed with an immediate referral to the designated child protection office of staff or the head teacher. If the student presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by a DSL or DDSL, mental health lead. Guidance about referring to CAMHS is provided in the Appendix D.

4. Individual Care Plans

It is helpful to draw up an individual care plan for pupils causing concern or who receive a diagnosis pertaining to their mental health. This should be drawn up involving the pupil, the parents and relevant health professionals. This can include:

- Details of a pupil's condition
- Special requirements and precautions
- Medication and any side effects
- What to do, and who to contact in an emergency
- The role the school can play

5. Teaching about Mental Health

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our developmental RSHE and PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we're teaching but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

6. Signposting

We will ensure that staff, students and parents are aware of sources of support within school and in the local community.

7. Warning Signs

School staff may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should report their concerns through Edukey.

Possible warning signs include (but are not limited to):

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Abusing drugs or alcohol
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing – e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

8. Managing disclosures

A student may choose to disclose concerns about themselves or a friend to any member of staff so all staff need to know how to respond appropriately to a disclosure.

If a student chooses to disclose concerns about their own mental health or that of a friend to a member of staff, the member of staff's response should always be calm, supportive and non-judgmental.

Staff should listen, rather than advise and our first thoughts should be of the student's emotional and physical safety rather than of exploring.

All disclosures should be recorded through Edukey.

This information should be shared with the DSL/DDSL who will offer support and advice about next steps. See appendix for guidance about making a referral to CAMHS.

9. Confidentiality

We should be honest with regards to the issue of confidentiality. If we see it is necessary for us to pass our concerns about a student on then we should discuss with the student:

- Who we are going to talk to
- What we are going to tell them
- Why we need to tell them

Ideally, we would receive pupil and or family consent for sharing information with relevant agencies, though there are certain situations when information must always be shared if the child is at risk.

It is important for staff to safeguard our own emotional wellbeing by speaking to the DSL/DDSL (or a representative from the EAP) as we are no longer solely responsible for the student, it ensures continuity of care in our absence and it provides an extra source of ideas and support. We should explain this to the student and discuss with them who it would be most appropriate and helpful to share this information with.

If a child gives us reason to believe that there may be underlying child protection issues, parents should not be informed and the DSL or DDSL must take appropriate action.

10. Working with Parents/Careers

Where it is deemed appropriate to inform parents, we need to be sensitive in our approach. Before disclosing to parents we should consider the following questions (on a case by case basis):

- Can the meeting happen face to face? This is preferable.
- Where should the meeting happen? At school, at their home or somewhere neutral?
- Who should be present? Consider parents, the student, other members of staff.
- What are the aims of the meeting?

It can be shocking and upsetting for parents to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We will be accepting of this (within reason) and give the parent time to reflect.

We will always highlight further sources of information and give them leaflets to take away where possible as they will often find it hard to take much in whilst coming to terms with the news that you're sharing. Where necessary and applicable, sharing sources of further support aimed specifically at parents can also be helpful too e.g. parenting classes.

We should always provide clear means of contacting us with further questions and consider booking in a follow up meeting or phone call right away as parents often have many questions as they process the information. Finish each meeting with agreed next step and always keep a brief record of the meeting on Edukey.

Parents are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents we will:

- Highlight sources of information and support about common mental health issues as and when necessary
- Ensure that all parents are aware of who to talk to, and how to get about this, if they have concerns about their own child or a friend of their child
- Make our mental health policy easily accessible to parents

- Keep parents informed about the mental health topics their children are learning about in RSHE and PSHE and share ideas for extending and exploring this learning at home

11. Training

As a minimum, all staff will receive training about recognising and responding to mental health issues as part of their regular safeguarding and child protection training in order to enable them to keep students safe.

Training opportunities for staff who require more in depth knowledge will be considered as part of our performance management process and additional CPD will be supported throughout the year where it becomes appropriate due developing situations with one or more students.

12. Policy Review

This policy will be reviewed every 3 years as a minimum. It is next due for review in July 2023

13. Appendix A: Further information and sources of support about common mental health issues

Prevalence of Mental Health and Emotional Wellbeing Issues³

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder - that is around three children in every class.
- Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm.
- There has been a big increase in the number of young people being admitted to hospital because of self harm. Over the last ten years this figure has increased by 68%.
- More than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time.
- Nearly 80,000 children and young people suffer from severe depression.
- The number of young people aged 15-16 with depression nearly doubled between the 1980s and the 2000s.
- Over 8,000 children aged under 10 years old suffer from severe depression.
- 3.3% or about 290,000 children and young people have an anxiety disorder.
- 72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below, we have sign-posted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website. Some pages are aimed primarily at parents but they are listed here because we think they are useful for school staff too.

Support on all of these issues can be accessed via [Young Minds](http://www.youngminds.org.uk) (www.youngminds.org.uk), [Mind](http://www.mind.org.uk) (www.mind.org.uk) and (for e-learning opportunities) [Minded](http://www.minded.org.uk) (www.minded.org.uk).

Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

Anxiety, panic attacks and phobias

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Obsessions and compulsions

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their

house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic

behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.

15. Appendix C: Data Sources

[Children and young people’s mental health and wellbeing profiling tool](#) collates and analyses a wide range of publically available data on risk, prevalence and detail (including cost data) on those services that support children with, or vulnerable to, mental illness. It enables benchmarking of data between areas

[ChiMat school health hub](#) provides access to resources relating to the commissioning and delivery of health services for school children and young people and its associated good practice, including the new service offer for school nursing

[Health behaviour of school age children](#) is an international cross-sectional study that takes place in 43 countries and is concerned with the determinants of young people's health and wellbeing.

16. Appendix D: What makes a good CAMHS referral?

If the referral is urgent it should be initiated by phone so that CAMHS can advise of best next steps

Before making the referral, have a clear outcome in mind, what do you want CAMHS to do? You might be looking for advice, strategies, support or a diagnosis for instance.

You must also be able to provide evidence to CAMHS about what intervention and support has been offered to the pupil by the school and the impact of this. CAMHS will always ask 'What have you tried?' so be prepared to supply relevant evidence, reports and records.

General considerations

- Have you met with the parent(s)/carer(s) and the referred child/children?
- Has the referral to CMHS been discussed with a parent / carer and the referred pupil?
- Has the pupil given consent for the referral?
- Has a parent / carer given consent for the referral?
- What are the parent/carer pupil's attitudes to the referral?

Basic information

- Is there a child protection plan in place?
- Is the child looked after?
- name and date of birth of referred child/children
- address and telephone number
- who has parental responsibility?
- surnames if different to child's
- GP details
- What is the ethnicity of the pupil / family.
- Will an interpreter be needed?
- Are there other agencies involved?

Reason for referral

- What are the specific difficulties that you want CAMHS to address?
- How long has this been a problem and why is the family seeking help now?
- Is the problem situation-specific or more generalised?
- Your understanding of the problem/issues involved.
